

IT HAS NEVER BEEN **THIS EASY** MANAGING UAS OPERATIONS

Operating UAS requires more than flying.

A single platform to manage pilots,
UAS, batteries, operations, maintenance,
logs, documentation and evidence.

v1.1

Everything connected, from planning to final reporting

Overview of an operational ecosystem designed for **private and professional UAS operators**

01 Map-base planning

Check connected airspace information with local provider and follow step-by-step assistance to prepare your operations.

02 DRONCORE Log Sync y DJI Cloud Sync

Automatically sync flights and logs with DJI and other brands. Keep all operational information organised.

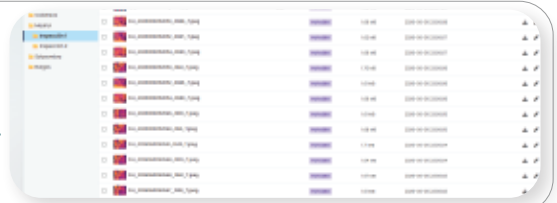

03 DRONCORE Meteo

Integrated weather information adapted to your UAS to support better-informed decisions.

04 DRONCORE Cloud

Store, organise and link photos, videos, 360° content and documentation to each operation. Everything accessible from the cloud.

05 Emergencies and security

Specific tools for teams operating in critical and emergency contexts.
